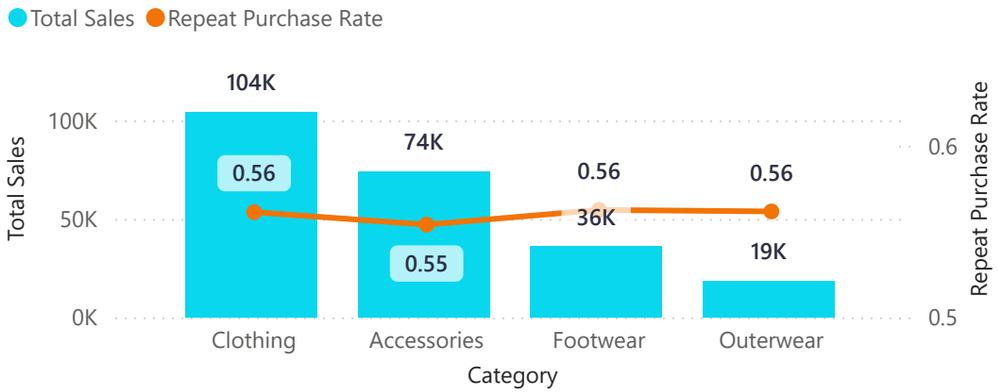
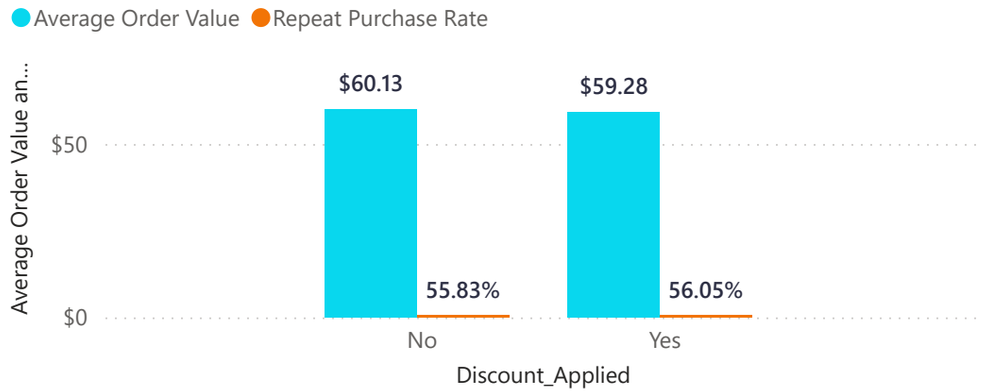
Revenue vs Repeat Purchase Rate by Category



Impact of Discounts on Order Value and Loyalty



Executive Summary:
Discount usage slightly improves loyalty but does not significantly increase average order value, suggesting limited long-term impact on customer retention.

Category Insight:
High revenue categories do not always demonstrate the strongest repeat purchase rates, indicating potential opportunities to enhance customer engagement strategies within top-performing segments.

Channel & Promotion Insight:
Online channel contributes the majority of revenue, while discount impact on customer loyalty remains marginal. Strategic targeting of promotions may be more effective than broad discount application.

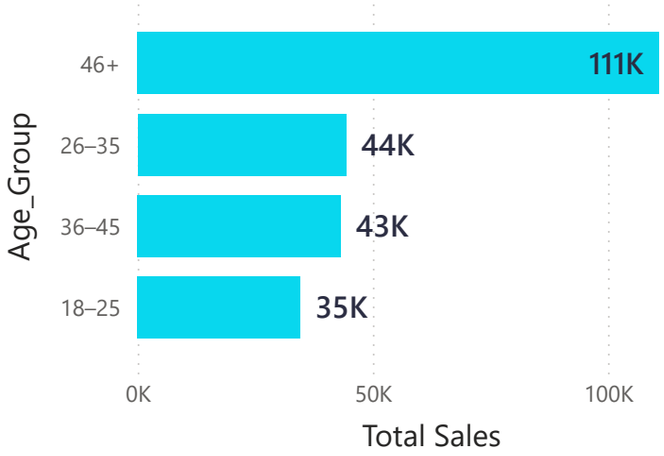
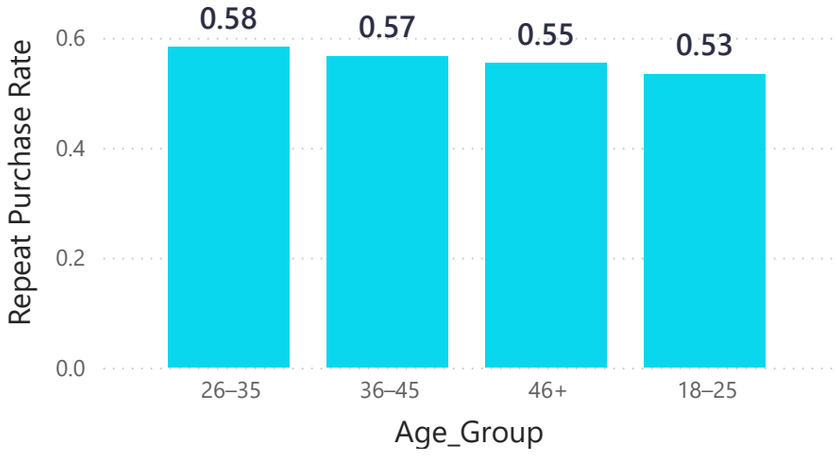
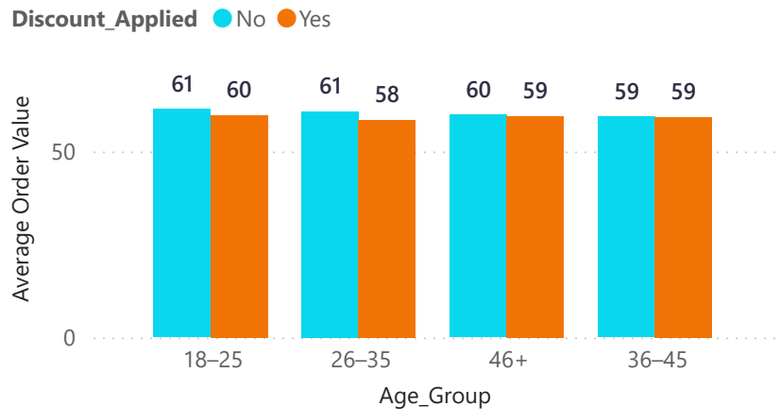
Revenue Contribution by Age Segment



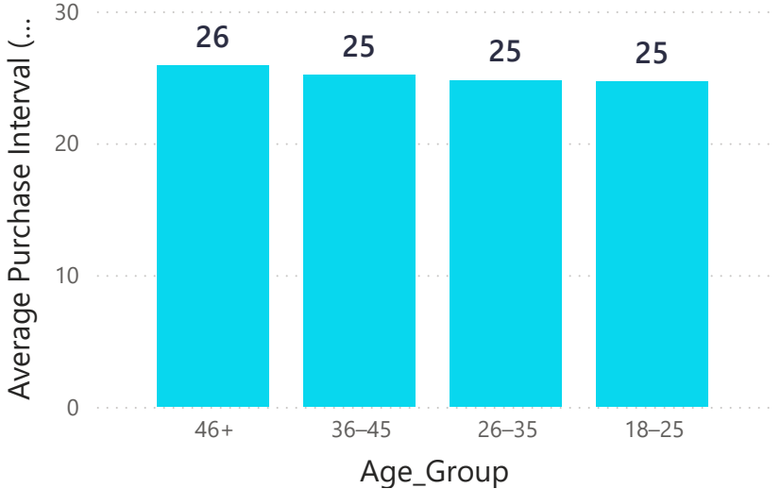
Repeat Purchase Rate by Age Group



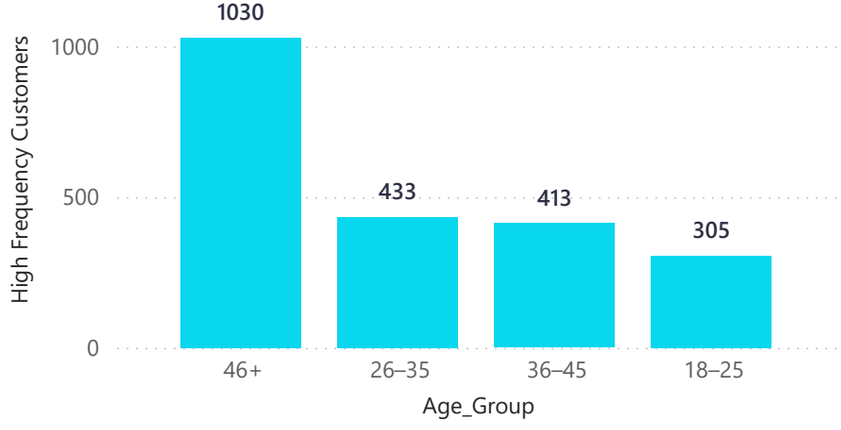
Discount Impact on Spending by Age Segment



Purchase Frequency by Age Segment



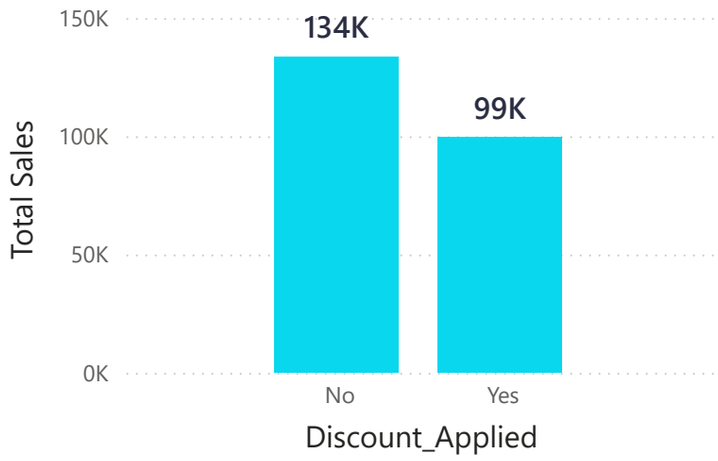
High-Frequency Customer Share by Age Segment



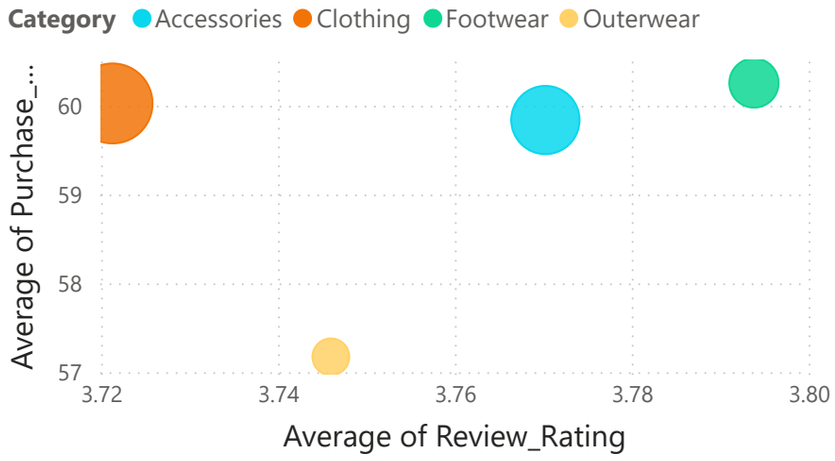
- The 26–35 segment drives the highest revenue, while the 46+ segment shows stronger high-frequency behavior, indicating higher loyalty potential.
- Purchase frequency is relatively consistent across age groups, and discount impact on average order value appears limited, suggesting opportunities for more targeted promotional strategies.

Purchase Drivers & Behavioral Impact

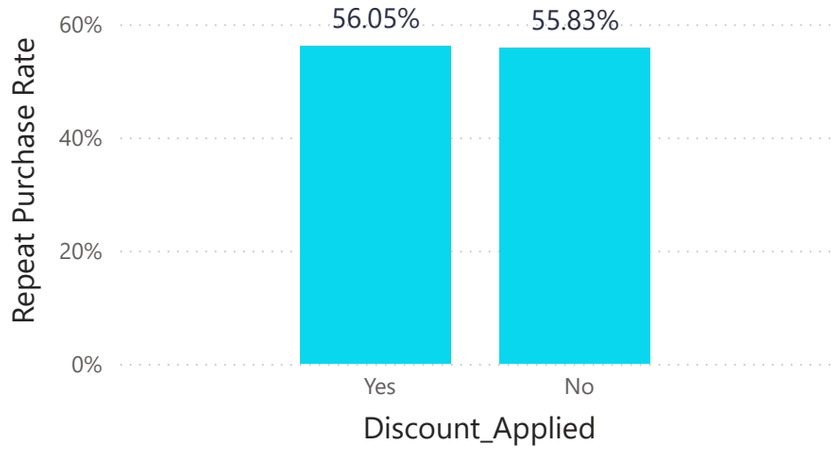
Revenue by Discount Applied



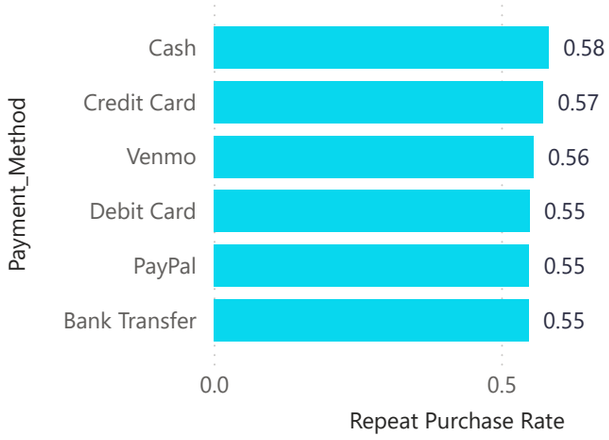
Customer Ratings vs Spending Behavior



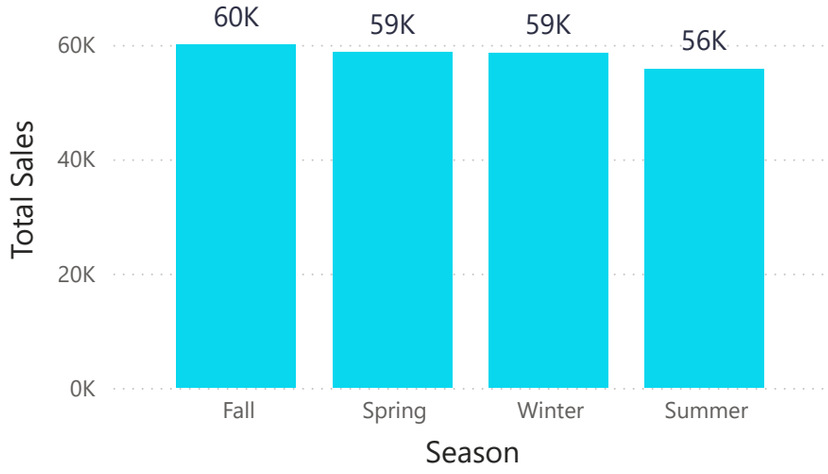
Discount Impact on Customer Loyalty



Customer Loyalty and Spending by Payment Method



Seasonal Impact on Revenue



- Revenue performance appears largely independent of discount incentives, as non-discounted transactions generate comparable or higher revenue and loyalty rates. Repeat purchase behavior remains consistent across promotional strategies and payment preferences, indicating intrinsic customer value rather than incentive-driven retention.
- Category dynamics and seasonal patterns demonstrate stronger influence on revenue variation than customer ratings or discount usage, highlighting opportunities for strategic product and timing optimization.

Strategic Growth & Retention Opportunities

Customers at Retention Risk

At Risk Customers

1.719K

- Revenue remains largely driven by the broader standard customer segment, while high-value customers contribute disproportionately higher spending and slightly stronger loyalty. Protecting this premium segment is essential for stable revenue growth.
- The 46+ age group represents a meaningful share of high-value customers, indicating targeted engagement within mature demographics could enhance retention performance.
- Category-level repeat rates are relatively consistent, suggesting growth opportunities may lie more in cross-selling and increasing order value rather than major

Business Recommendations & Key Takeaways

Total Sales	Repeat Purchase Rate	At Risk Customers
233K	55.92%	1.719K

Revenue Strategy

Revenue performance is not heavily dependent on discount usage, as non-discounted transactions contribute comparable or higher sales volume. High-value customers generate disproportionate revenue and require focused retention strategies to sustain growth.

Revenue Strategy

Approximately 2K customers fall into a potential retention risk segment. Strengthening engagement programs and personalized communication for vulnerable customers can reduce future revenue leakage.

Growth Opportunities

The 46+ age segment represents a strong concentration of high-value customers. Targeted marketing and loyalty programs for mature demographics could further enhance lifetime value.

Promotional Optimization

Discounts show limited influence on repeat purchase behavior, suggesting promotional spending should shift toward experience-driven and value-based retention initiatives rather than broad discounting.
